FINANCE & BUSINESS ANALYST

Finance, Data & Underwriting Analyst with 6+ years of experience across fintech, insurance, alternative lending, risk analysis, business intelligence, and reporting automation. Skilled in analyzing financial and operational data to support risk assessment, underwriting decisions, forecasting, variance analysis, reconciliation, and strategic reporting. Experienced with Power BI, Tableau, SQL, Python, Excel, VBA, Power Query, and Databricks, with a strong ability to translate complex data into decision-ready insights for cross-functional teams.

PROFESSIONAL EXPERIENCE

Underwriting Analyst | Fintap | Clifton, NJ | Aug 2025 – Present

- Reviewed 100+ merchant and application files daily to support MCA and alternative lending approval decisions.
- Analyzed bank activity, cash flow behavior, business information, ownership records, and application details to identify risk signals, inconsistencies, missing documents, and exception patterns.
- Analyzed approval, decline, and post-decision trends to support continuous improvement and automation of underwriting workflows.
- Supported KYC, background, and business legitimacy checks to reduce fraud exposure and prepare merchant files for underwriting review.
- Collaborated with brokers, ISOs, sales teams, and internal underwriters to request documents, resolve discrepancies, and support timely deal progression.
- Ensured underwriting files were reviewed in accordance with company policies, documentation standards, compliance expectations, and applicable lending procedures.
- Prepared underwriting summaries, documentation notes, and file reviews in accordance with company policies, compliance expectations, and internal risk assessment procedures.

Data & Financial Analyst | The Pension Boards (PBUCC) | New York, NY | Aug 2024 – Jul 2025

- Developed an interactive Analytics Resource Book analyzing member demographics, contribution behavior, retirement participation, investment patterns, and financial trends.
- Built Power BI/Tableau dashboards tracking plan performance, health plan activity, member behavior, participation metrics, and operational KPIs.
- Conducted time-series, variance, and trend analysis across 2016–2025 financial and operational datasets to support quarterly FP&A decision-making.
- Cleaned, validated, and reconciled 10,000+ member and employer records during HubSpot CRM transition to improve data quality, segmentation, and reporting accuracy.
- Automated recurring reporting workflows using Python, Databricks, Excel, VBA, and Power Query, improving consistency and reducing manual processing.

Finance & Analytics Intern | The Pension Boards (PBUCC) | New York, NY | Mar 2024 – Jul 2024

- Developed a data-driven capstone analysis to support a personalized guided service plan, identifying opportunities to improve member engagement with PBUCC programs, benefits, and retirement planning resources.
- Applied customer segmentation, behavioral analytics, and predictive modeling concepts to tailor recommendations across members' financial, physical, mental, and spiritual wellbeing needs.

- Built financial intelligence reports using Python, Excel, and Power BI to analyze financial trends, member behavior, plan participation, and operational performance indicators.
- Supported annuity reconciliation processes by identifying payment discrepancies, missing transactions, overpayments, and underpayments across systems.

Data Analyst, Insurance & Financial Analytics | Jubilee Insurance Co | Nairobi, Kenya | May 2018 – Jun 2023

- Built forecasting and reserve analysis models to support premium projections, loss trend monitoring, and operational planning across underwriting, actuarial, claims, and reinsurance teams.
- Conducted budget vs. actual variance analysis to identify cost drivers, claim patterns, loss trends, and growth constraints affecting business performance.
- Prepared, cleaned, and validated analytical datasets used in underwriting, actuarial, claims, and finance reviews, ensuring consistency across policy, claims, premium, and financial reporting systems.
- Analyzed insurance and operational data to support risk assessment, portfolio monitoring, reserve adequacy review, and financial planning.
- Collaborated with cross-functional stakeholders to translate analytical outputs into reporting insights for underwriting performance, reserve adequacy, claims exposure, and financial planning.
