FINANCE & BUSINESS ANALYST

Finance and analytics professional with experience across alternative lending, underwriting, insurance, and financial services. Skilled in analyzing borrower and business performance data, building decision-ready reports, identifying risk patterns, and translating complex datasets into insights for leadership. Strong background in Excel financial analysis, Power BI dashboards, SQL/Python analytics, reporting automation, and cross-functional work with finance, operations, underwriting, and executive stakeholders.

CORE SKILLS

- **Analytics & Financial Modeling:** SQL, Python (Pandas, NumPy), KPI reporting, business performance analysis, market research, risk analysis, scenario analysis, variance analysis
- **Business Intelligence & Automation:** Power BI (DAX), Tableau, Databricks, Advanced Excel (Power Query, VBA scripting), reporting automation, dashboard design
- **Systems & Data:** Salesforce, NetSuite ERP, HubSpot CRM, AWS, multi-system reconciliation, ETL

PROFESSIONAL EXPERIENCE

Underwriting Analyst | FinTap | Aug 2025 – Present

- Reviewed merchant/application data to support MCA and alternative lending approval decisions, balancing funding opportunity, repayment risk, and internal underwriting guidelines.
- Analyzed bank activity, financial behavior, business information, and exception patterns to identify potential risk signals and documentation inconsistencies.
- Analyzed approval, decline, and post-decision trends to support continuous improvement and automation of underwriting workflows.

Data & Financial Analyst | The Pension Boards – United Church of Christ (PBUCC) | Mar 2024 – Jul 2025

- Conducted time-series and variance analysis across financial and operational data from 2016–2025 to identify performance trends, cost behavior, and risk signals for quarterly decision-making.
- Built Power BI dashboards tracking plan performance, member behavior, and participation metrics to improve operational visibility and resource allocation.
- Led data cleaning and validation for 10,000+ member and employer records to support HubSpot CRM migration and funnel accuracy.
- Reconciled data across systems, reducing data leakage and improving reporting reliability for leadership decisions.
- Automated recurring reporting workflows using Python, Excel, VBA, and Power Query, reducing manual processing time and decision latency.

Data Analyst | Jubilee Insurance Company | May 2018 – Jun 2023

- Built forecasting and reserve analysis models to improve premium projections and operational planning for the underwriting, actuarial, claims, and reinsurance teams
- Conducted budget vs. actual variance analyses to identify cost drivers, loss trends, and growth constraints.
- Prepared and validated analytical datasets used in underwriting and actuarial reviews, ensuring consistency across policy, claims, and finance systems.
